DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 2, 7, 8, 13, 14, and 19-21 (part of each), drawn to compounds of formula (I) with R_1 as $(CH_2)_n$ -pyrimidinyl- Y_1 , and R_6 as a group selecting from (a)-(o), (r)-(w), (cc)-(jj), (kk)-(ss), and (tt)-(bbb); their pharmaceutical compositions and methods of use, classified in class 544, subclasses: 333, 335, etc.
- II. Claims 1, 2, 7, 8, 13, 14, and 19-21 (part of each) , drawn to compounds of formula (I) with R_1 as $(CH_2)_n$ -1,3,5-triazine- Y_1 , and R_6 as a group selecting from (a)-(bbb); their pharmaceutical compositions and methods of use, classified in class 544, subclasses: 180, 216.
- III. Claims 1-21 (in part), drawn to compounds of formula (I) with R_1 as C_{1-8} alkyl; $(CH_2)_n$ - Y_2 ; $(CH_2)_n$ -phenyl- Y_1 ; $(CH_2)_n$ -pyridyl- Y_1 , and R_6 as a group selecting from (a)-(w), and (cc)-(bbb); their pharmaceutical compositions and methods of use, classified in class 546, subclasses: 122, 139, 152, etc.
- IV. Claims 1, 2, 7, 8, 13, 14, and 19-21 (part of each), drawn to compounds of formula (I) with R_1 **not** as $(CH_2)_n$ -1,3,5-triazinyl- Y_1 , and R_6 as a group selecting from (x), (y), (z), (aa), and (bb); their pharmaceutical compositions and methods of use, classified in class 544, subclasses: 183, 184.

The inventions of groups I - IV differ from each other because each group is drawn to a combination of ring systems that is distinct and patentable over each other. Essentially, these are four independent inventions as compounds of one group can be utilized alone, and not in combination of those in other groups. Note, with a variable core as such, the common property is not enough to keep four groups in the same Markush claim. Furthermore, a prior art that renders obvious one invention would not do so to the other. Thus, restriction for examination purpose as indicated is proper. However, should applicant traverse on the ground that the four groups are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the four groups to be obvious variant or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the invention unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Dr. Derek Mason on 5-20-02 to request an oral election to the above restriction requirement, but due to the complexity of substituents, a written restriction was preferred.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
